# MP-Hub

# MaxiPark
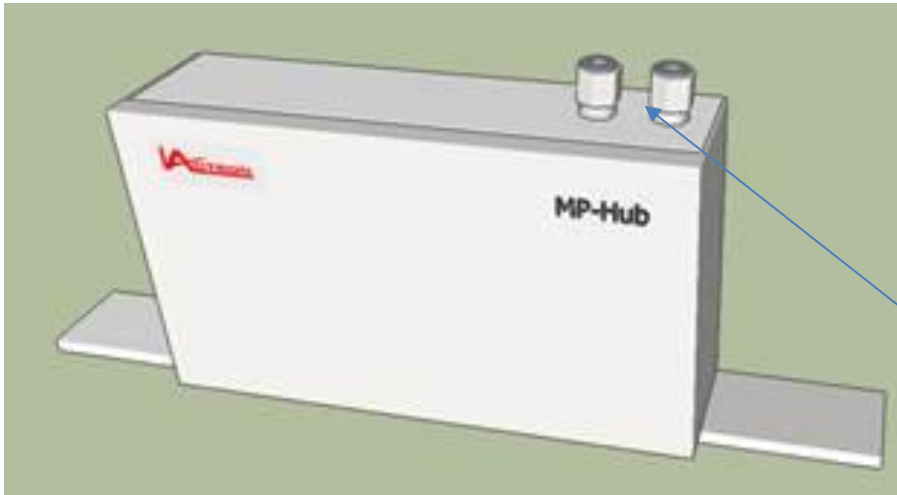

Connected to the communication bus (CAN bus) performs the connection between MP-Hub and the MP-Sens boards The Hub can connect maximum 120 MP –Sens units (parking slots).

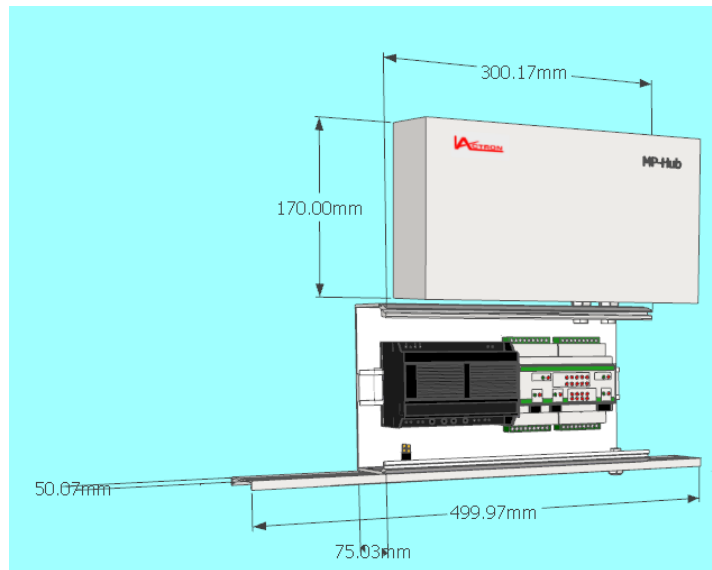

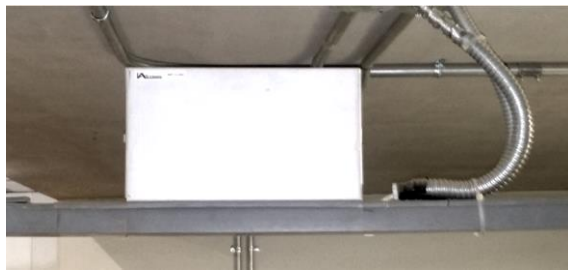

The MP-Hub connects via TCP/IP ( Ethernet) to the MP-MasterHub.
Connections to the hubs are as in the picture below.

Power supplies up to 25 parking slots.  If more than 25 parking slots one or more MP-PS has to be added.

Connections for TCP/IP and power

To be snapped on the trunking.

Supplies for parking slots    3 A 24 VDC
Power Supply    100  -  240 V AC
IP22
Part no. MP-Hub

## MP-Hub/ IO

Hub trunk mounted with IO
10    24 VDC inputs
6    Relay Outputs
4    Analog 8 In
2    Analog Out
IP22

Part no. MP-Hub/IO
