# Large Retail Chain

The demo retail chain is called M and H and there are more than 1000 retail stores around the world

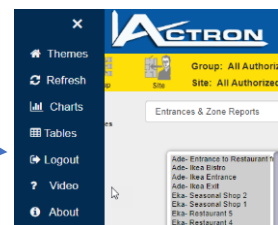

This is a demo project which shows a lot of the power of the new generation of MPC Universe web reports.

It shows how a the reports can cover a large Retail chain with several 1000 retail stores in different countries and still make the reporting flexible and easy to use.

This is done through category search system, which enables selections and comparisons in a unique way.

You can get **video help** when you have logged in
